

Fast stamps

he fastest self-made stamps. You do not even need paint. Take some pompoms, and stick some self-adhesive craft foam shapes from the Jumbo Box onto them. Colour the shapes with a highlighter or felt pen, and you can print it immediately. It is especially practical to work with felt pens, as they dry fast. The child does not have to wait for it, and their clothes will stay clean. Afterwards, the child can develop his colouring skills as well, by finishing colouring the shape. Practical and useful at the same time.
