

Spooky Ghost Halloween DIY

Cut the ghost shape line out of a craft foam and make 2 eyes as well. Glue together the cut out small shapes to set up the ghost wall. If you need to lean it, put the candle on it, which keeps it as a counterweight.

It is that simple! Start the Halloween activity with the kids!

Use a candle, or better your phone, and play with the distance, so your ghost will be bigger-smaller - thinner-thicker, but sure it will become spooky and funny.

Take from the PepMelon Jumbo Box:

- 1 craft foam (orange)
