

3D Christmas tree in a frame - Christmas gift

Use the template on the second page. This fits into a 9x14 cm inner frame. Cut the triangular shapes. Draw around twice each of them on a green craft foam. So there will be a total of 6 triangles. Glue the same size of triangles together till half-part, and the other parts glue to the paper in the frame. Push, and keep it for 10 seconds. Repeat with all pieces. Then decorate with rhinestones.

Take from PepMelon Jumbo Box:

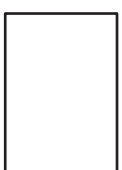

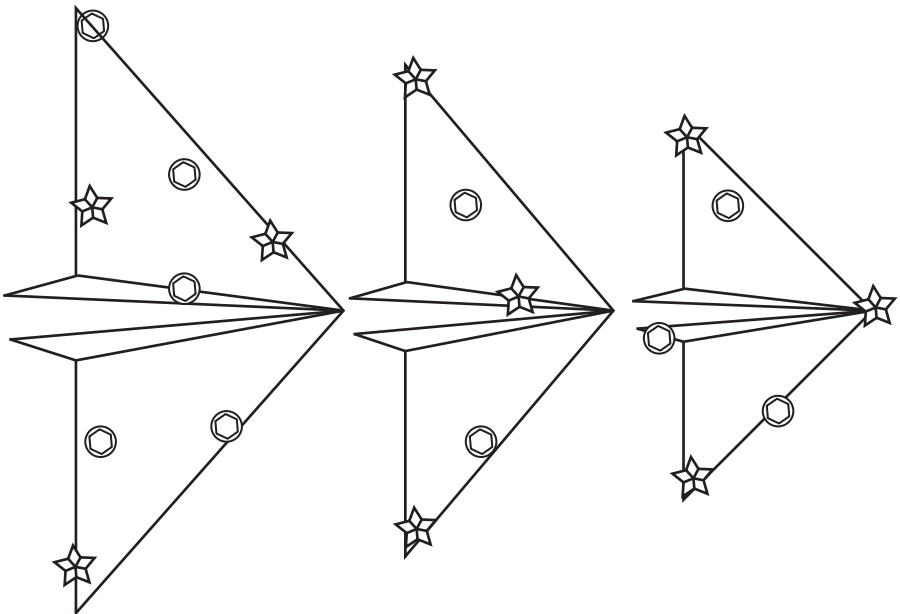

- 1 green craft foam
- a handful of rhinestone

Have fun!
